**DETAILED ACTION**

**Election/Restrictions**

1.: This application contains claims directed to the following patentably distinct species of the claimed invention:

(i) an ink jet recording apparatus and corresponding method in which the scanning speed of the carriage is adjusted so as to suppress an increase in negative pressure in an ink supply tube.

(ii) an ink jet recording apparatus and corresponding method in which a non-recording time is adjusted so as to recover a pressure in an ink supply tube.

(iii) an ink jet recording apparatus and corresponding method in which the number of overlap recording scanning times of a carriage is adjusted so as to recover a pressure in an ink supply tube.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

For the purpose of obtaining claims to more than one species in the same case, the generic claim cannot include limitations not present in each of the added species (MPEP 608.04(d)). It should be noted that more than one species of an invention, not to exceed a reasonable number, may be specifically claimed in different claims in one national application, provided the application also includes an allowable claim generic to all the claimed species and all the claims to species in excess of one are written in dependent form (37 CFR

• Art Unit: 2861

1.75) or otherwise include all the limitations of the generic claim (37 CFR 1.141(a)). Moreover, pursuant to MPEP 808.01(a), the reasons for insisting upon election of one species, are the facts relied on for the conclusion that there are claims restricted, respectively, to two or more patentably different species that are disclosed in the application, and it is not necessary to show a separate status in the art or separate classification.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2861

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
